Comparing the Effectiveness of Machine Learning Algorithms for Predicting Device Types

Anh Nguyen
Student Number: 14164426

Project deliverable

June, 2025

Project Overview

The repository includes a README.md file and code files. The experiments on the datasets are presented in a separate code file, Anh_Nguyen_Bachelor_Thesis.ipynb.

In the code file, the outline and order of steps in the project are similar to the thesis. The experimental results and visualization of qualitative analysis are included in the code file as well. There are brief comments on the code file that explain the steps or definition of the outputs.
